Fire Safety Direct Fire Equipment

Fire Fighting Branch (Nozzle) Protek 360 with Adapter

Price per Unit (piece): \$731.50 (including 10 % tax)

Protek 360 Select Flow Low Literage Fire Fighting Nozzle with 25mm inlet.

Durable lightweight aluminium construction

Combination of fog and straight stream, tight straight stream and wide dense fog.

The Protek 360 Fire Fighting Branch has an inlet size of 25mm.

This Fire Fighting Branch is very popular as a part of the Fire Fighting Gear with many fire brigades throughout Australia as it has a flow rate from 19lpm to 150lpm which is great for conserving water.

Flush without shutting down

Designed application up to 40 bar (580 PSI)

Conforms to all aspects of current NFPA 1964 Standard

Contact us if you would like more information on other Protek Branches (Nozzles) like the Protek 366 or Protek 368.
