Fire Safety Direct Fire Equipment

Diablo 25mm Layflat Fire Hose (Uncoupled) x 30m

Price per Unit (piece): \$148.50 (including 10 % tax)

Our Diablo is the latest Forestry Fire Fighting Hose. The Diablo Fire Hose offers better abrasion resistance to give a longer service life in the field whilst still providing a constant mild percolation to self protect.

We specifically colour coded the fire hose RED, (hence the name Diablo - Devil), so that it will stand out in a locker against standard white non percolating layflat hoses. This also makes for easy hose identification when working with other agencies.

The Diablo Fire Hose has an all synthetic jacket and is unaffected by mildew and will retain its strength and durability under all climatic conditions.

Diablo Complies with AS2792 - Class H and is designed to withstand exceptionally high pressure while maintaining the self-protecting features of percolation.

The Diablo Forestry Fire Fighting Hose has a burst pressure of 5250Kpa and a working pressure of 2100Kpa.

This hose has a unique lining of compounded RUBBER LATEX to significantly increase the life of the Diablo.

Available in both 25mm and 38mm sizes We are able to supply the Diablo with your choice of coupling attached.
